Work Experience

R&D Product Manager 2

Mar 2024 - Present

o9 Solutions Inc., Bangalore

- Built **70+ product features** for **Core Data Platform widgets** - Pivot, Charts, Filters, Workflows, KPIs, and Performance Monitor translating requirements into **PRDs, prioritised backlogs, and releases**. (akin to **Power BI**).
- Managed product requirements and feature delivery for customers contributing **$6M in ARR**, while driving **cross-functional stakeholder alignment and communication** across multiple teams.
- Enhanced charting visualisations by migrating from legacy JQPlot library to Modern High charts library, enabling **11 new features** and **added 5 new chart types**, enhancing **data analysis** capabilities.
- **Led the UI** for a **no-code AI Agent Builder,** enabling teams to deploy 35+ agents in 3 months.
- Built ONA AI agents for PRDs, test cases, and bug analysis, cutting team effort ~30% and speeding up bug triage ~6x.

Senior Product Manager

Nov 2022 - Feb 2024

Zycus, Bangalore

- **Led Generative AI initiatives** for Source-to-Pay (S2P) invoice data extraction, managing APMs to raise extraction accuracy by 15–20%.
- Developed an **AI workflow development** use case for a daily batch job to automatically prioritize emails, securing **stakeholder engagement** and leading to **2 new enterprise customers** and highlighting **business value realization**.
- Automated invoice routing using historical patterns and invoice coding, reducing manual assignment time by **30%** and freeing **1 week** of AP team member time monthly through **AI capability scouting** and **automation**.
- Built a business case to secure AI team buy-in for large-scale model training, launching Invoice Predictive Path, an AI application that cut invoice processing time by 12% and raised earned discounts by 6%.

Product Manager L3

May 2019 - Jul 2022

Greytip Software Ltd, Bangalore

- Led **product management in HRMS domain** to build 6 modules from 0→1 - including Employee Separation (**300+ customers**), Facial Attendance (**1,000+ customers**), Overtime (**100+ enterprises**), Letter Generation, and Employee Confirmation Module.
- Spearheaded revamp of an unstable mobile Employee Self-Service (ESS) portal, leading project management across 15 developers and 2 APMs to deliver 18+ screens, stabilising the app and enhancing mobile UX.
- **Facilitated** and **Collaborated product launches** by securing 5 cross-departmental buy-ins and approvals through strategic **stakeholder engagement**, enabling timely market entry backed by A/B tested results.
- Drove **product strategy** to automate the employee separation process, reducing process time from 2-3 days to a fraction by collaborating with multiple internal teams to deliver a new module with immediate ROI.
- Launched AI based facial recognition attendance capture during COVID-19, restoring 40% of biometric swipes .

Product Manager
Nov 2018 - May 2019

Survaider

- **Launched Sentiment based AI Task Creator** for a Customer Experience Management (CXM) platform, automating issue resolution from customer reviews and projecting a 10% review score lift in 5 months.
- Overcame web crawler blocks via API integrations, streamlining review extraction across 5+ channels and adapted product strategy to expand into checklists and operational reviews.

Associate Product Manager
May 2017 - Nov 2018

People Tech Group, USA - Bellevue

- **Managed** product strategy for a new Jury Management System, securing **stakeholder** and customer buy-in to a project with **1.5x revenue** potential and **30% developer capacity constraints**.
- Drove **business development** by conducting **product demonstrations** to secure new clients, resulting in **4 letters of intent** and Statements of Work (SOWs) from existing customers.
- Analyzed and Resolved A/B testing issues by collaborating with IT & Tech teams, preventing user disruption and enabling a successful release.

Software Test Engineer
Dec 2013 - Jul 2015

Tech Mahindra, Bangalore

- Worked as a Test Engineer supporting the mediation platform of a leading Netherlands-based telecom operator.
- Overcame rigorous testing complexities by authoring and executing **500+ test cases**, earning **2** performance awards.

AI Tools & Capabilities

- **AI-Assisted Full-Stack Development:** Build and deploy end-to-end web applications with integrated AI features using Claude Code, including Google OAuth authentication and cloud hosting using Google firebase.
- **AI-Powered Product Discovery:** Conduct AI-driven product research, AI capability scouting, and AI productisation to identify and validate opportunities.
- **Agent UX design ,Prototyping** & **Documentation:** Prototype with Figma Make and author structured Markdown PRDs and research docs optimised for AI agents
- **Agentic AI & Multi-Agent Systems:** Design and build agentic workflows and multi-agent systems using Claude, Cursor, and GitHub Copilot, with tool use, Skills, and Model Context Protocol (MCP) integrations
- **Autonomous Agent Workflows:** Run iterative autonomous coding loops to build complete UI applications with minimal manual intervention.
  - **Workflow Automation:** Build no-code and low-code automation workflows in n8n.
- **Tools:** Claude Code, Claude Agent SDK, Cursor, GitHub Copilot, n8n, Figma Make, MCP, Google OAuth
- Prompt engineering and context engineering
